

CONTENTS

PREFACE	5
BAUTISTA BÁRCENA Lucía, TORRES CASTRO Inmaculada, LANDESA PORRAS Luis A condition-based maintenance for complex systems consisting of two different types of components.....	7
BLOKUS Agnieszka, KWIATUSZEWSKA-SARNECKA Bożena Safety analysis of the system of crude oil transhipment.....	17
BOGALECKA Magdalena Modelling maritime critical infrastructure accident consequences with semi-Markov chain method	33
ČEPIN Marko Reliability of power systems with increasing contribution from wind and solar power.....	51
DĄBROWSKA Ewa Safety analysis of car wheel system impacted by operation process	61
EID Mohamed Reliability based models to support risk management decision making	77
GRABSKI Franciszek Random processes related to accidents on Baltic Sea waters and ports	91
KOŁOWROCKI Krzysztof Safety analysis of multistate ageing car wheel system with dependent components	101
KOŁOWROCKI Krzysztof, MAGRYTA-MUT Beata Safety of maritime ferry technical system impacted by its operation process	117
KOSMOWSKI Kazimierz T. Systems engineering approach to functional safety and cyber security of industrial critical installations.....	135
KOSTOGRYZOV Andrey, NISTRATOV Andrey Probabilistic methods of risk predictions and their pragmatic applications in life cycle of complex systems	153
MAGRYTA-MUT Beata Safety optimization of maritime ferry technical system	175
MALINOWSKI Jacek A fast method for enumerating all minimal d-cut-sets in a flow network	183
POPEK Marzenna The concept of sustainable development and safety in maritime transport.....	199
TCHÓRZEWSKA-CIEŚLAK Barbara, RAK Janusz, PIETRUCHA-URBANIK Katarzyna Ensuring an adequate level of quality of water supply in regard to the safety of consumers....	209
TORBICKI Mateusz, DRABIŃSKI Bartosz An application determining weather impact on critical infrastructure safety and resilience.....	231
WILEMSKI Szymon Reliability analysis and optimization of multistate parallel-serial fuel transportation system in variable operating conditions.....	243
